SHANE PEREIRA

Lead Technical Product Manager · Enterprise Supply Chain Platforms · Consumer Commerce & Personalization · AI/ML Product Management

Bangalore, Karnataka 560064 · +91 8971040379 · shanepereira05@gmail.com · linkedin.com/in/shane-pereira-535970126

PROFESSIONAL SUMMARY

Lead Technical Product Manager with 13+ years scaling platforms across global e-commerce, AI/ML personalization, and enterprise supply chain technology at Nike, PUMA, Hopscotch, and Decathlon. Currently owns Pack & VAS product across four Nike distribution centers (Belgium, Australia, Japan) and leads intake and prioritization for the Supply Chain Planning technology organization — operating at multi-product, multi-geography scope with direct VP and value-stream-lead exposure. Shipped Packstation 2.0 to EMEA production with a measured **4.9 seconds-saved-per-pack lift across 318,000+ live packs**, underwriting a modelled **€5.64M in cumulative savings over FY26–FY29**. Previously delivered **€2M in revenue within 90 days** through PUMA India's global commerce app launch and a hybrid search-and-recommendations platform that lifted conversion 20%. Chairs the SCPT Product Council, mentors junior PMs, builds AI-native product practices, and converts production telemetry into board-ready investment cases — ready to step into a Director-level product leadership mandate.

SIGNATURE ACHIEVEMENTS

- **€5.64M** modelled FY26–FY29 from Packstation 2.0 (Nike EMEA) — **4.9 s / pack** lift across **318,000+** live packs in production
- **€2M** revenue in **90 days** launching PUMA India's global commerce app (+20% conversion vs web)
- Built an **Order Management System at 8%** of industry-standard cost; enabled **24-hour delivery** across 6 Indian metros (Decathlon)
- **CSAT 66% to 93%** across a 32-country e-commerce footprint (Decathlon)

PROFESSIONAL EXPERIENCE

Lead Technical Product Manager, Supply Chain Planning Technology — 01/2026 – Present

NIKE, Inc. – Bangalore, India

Scope. Pack & VAS product across 4 global Nike DCs (Belgium ×2, Australia, Japan); intake & prioritization portfolio for Supply Chain Planning tech; stakeholders from warehouse floor to VP.

Signature Outcomes — 4.9s saved / pack · 318,000+ live packs · €5.64M modelled FY26–FY29 · Zero-slip Japan DC launch

Own Pack & VAS product across four Nike distribution centers in Europe, Australia, and Japan. Lead intake, prioritization, and Product Council governance for the Supply Chain Planning technology organization. Partner with engineering, UX, data science, operations, and value-stream leadership from the warehouse floor to VP-level stakeholders.

PACKSTATION 2.0 – SHIPPED TO EMEA PRODUCTION, MEASURED ROI

- **Measured Productivity Lift:** Shipped the re-imagined three-panel packing UI to Cortez EMEA production (Sept 2026); over a 22-day live window across **318,000+ packs**, measured a weighted **4.9-seconds-saved-per-pack lift (−11% Bulk, −9% Repack)**, unlocking **€289K / 7,219 hours / 3.6 FTEs per year at Cortez** and a modelled **€1.42M in FY26 and €5.64M cumulative FY26–FY29** across the Cortez, Windrunner, and Wings EMEA DCs.
- **Design Sprint Leadership:** Facilitated the cross-functional Design Sprint (engineering, UX, warehouse operations, value-stream partners) that produced the three-panel UI blueprint; delivered design-to-EMEA-production in **~10 weeks across 5 sprints and 7 coordinated repo deployments**, with zero cross-DC blast radius.
- **Board-Ready Business Case:** Authored the investment case directly from Splunk production telemetry (SEQ methodology on true per-OLPN handling time, outliers above per-cell P99 trimmed), converting 318K live packs into the model used to greenlight the EMEA rollout.

- **Notify K2 Operator Service:** Launched the paired Slack-based athlete-to-supervisor ticketing service alongside Packstation 2.0, collapsing issue-raise time from **2–5 minutes of walk-and-wait to ~2 seconds (one tap)**, saving an estimated **2–3 packer-hours per shift at peak** and introducing a full audit trail where none previously existed.

GLOBAL DISTRIBUTION-CENTER PORTFOLIO

- **Portfolio Ownership:** Drive a single Pack & VAS product roadmap standardizing capabilities across four Nike distribution centers spanning Europe (Belgium × 2), Australia, and Japan.
- **Japan DC (J30) Launch – Zero Delays:** Delivered the greenfield Japan DC go-live with zero schedule slip; closed hypercare one week ahead of plan through rigorous end-to-end test coverage and proactive exception-flow readiness across MAWM, WCS, and TMS.
- **Automation Integration:** Built and validated Pack & VAS capabilities to interoperate with Japan's automated pick-to-pack sequencer belt, enabling picking automation to feed packing with no operator handoff friction.

INTAKE & PRIORITIZATION GOVERNANCE

- **Intake Process Design:** Defined the end-to-end intake process for Supply Chain Planning requests – idea → discovery → prioritization → execution – creating a governed, auditable pipeline for warehouse-productivity asks across the SCPT portfolio.
- **Intake Facilitation:** Chair the standing intake forum where every new ask from the Supply Chain Planning organization is triaged, sized, and routed; serve as the single point of coordination between business and engineering.
- **Product Council Leadership:** Chair the Product Council for prioritization and business-value challenge; enforce explicit ROI trade-offs before backlog commitment, protecting engineering capacity from low-value asks.

AI-NATIVE PRODUCT PRACTICE

- **AI-Accelerated Discovery:** Built LLM- and MCP-integrated tooling that mines 1,000+ Jira and Confluence artefacts across the SCPT portfolio, surfacing intake themes, dependency risks, and prioritization signals in hours instead of days.
- **AI-Assisted Prototyping:** Ship high-fidelity, interactive Pack & VAS mockups (bulk, full-case, end-of-shift scorecard) using LLM-driven code generation, compressing the design-to-stakeholder-review loop from weeks to a single working session.
- **AI-Augmented Product Documentation:** Standardized PRDs, intake briefs, and release notes with structured LLM prompt patterns, measurably lifting spec quality and reducing drafting time across the Beacon backlog.
- **AI Advocacy & Enablement:** Partner with engineering, UX, and data-science leads to introduce AI copilots into the SCPT operating rhythm (automated status roll-ups, intake triage) with responsible-use guardrails.

Senior Product Manager, Owned & Operated E-Commerce — 01/2022 – 01/2026

PUMA Sports India Pvt. Ltd – Bangalore, India

Scope. Mobile app, Search & Recommendations, CRM, payments, analytics for PUMA India; cross-functional with Germany, North America, Japan.

Signature Outcomes — €2M revenue in 90 days · +20% conversion · 4.9+ app rating (Top-10 global) · +21% AOV via pay-in-3

Led mobile commerce product for PUMA India across app, search and recommendations, CRM, payments, and analytics. Partnered with global teams in Germany, North America, and Japan, and mentored a bench of junior product managers.

- **Global App Launch:** Spearheaded the development and global launch of PUMA India's new commerce app, generating **€2M in revenue within 90 days** with **20% higher AOV, conversion rate, and ASP** than the web channel, setting new digital retail benchmarks.
- **Search & Recommendations Platform:** Designed and shipped a global Search and Recommendations platform using hybrid collaborative + content-based filtering, driving a **20% increase in conversion and average order value** in three months and an **18% lift in cross-sell**.
- **Machine Learning Personalization:** Directed collaboration with Data Science to productionize ML-based personalization that materially boosted engagement, retention, and repeat purchase.
- **AI-Driven App Optimization:** Integrated AI-powered features that sustained an app rating above 4.9 and secured recognition among the **top 10 global shopping platforms**; reduced App Not Responding (ANR) instances **30%+** while scaling to multi-million-user volumes.
- **CRM Transformation:** Implemented CleverTap CRM with a unified 360-degree online + offline customer profile across four time zones, driving personalized engagement and measurable increases in customer lifetime value.
- **Payments Innovation:** Launched pay-in-3 payments, increasing AOV **21%** and reducing return risk.
- **Experimentation Program:** Ran robust A/B testing and heatmap programs delivering **+3% Add-to-Cart, +15% product discovery, and +30% cart conversion**.
- **Analytics Modernization:** Led migration from Universal Google Analytics to GA4, redefining event and parameter schemas for deeper behavioral insight and better data-driven decisions.

- **Marketing Scale:** Orchestrated high-impact celebrity marketing campaigns resulting in **500K+ app downloads** and materially higher brand visibility.
- **Vendor Strategy:** Evaluated and onboarded third-party vendors (Branch, Emarsys, CleverTap), aligning each to product vision and lifting engagement, retention, and conversion.
- **Roadmap & People Leadership:** Defined and managed strategic product roadmaps aligned to corporate goals; mentored junior PMs on agile delivery and data-driven decision-making; provided cross-functional leadership across PM, Project Managers, Developers, Design, and Data Science.

Supply Product Manager — 06/2021 – 12/2021

Hopscotch Trading Pvt. Ltd – Bangalore, India

Scope. China-to-India supply chain, supplier MoQ alignment, import compliance; direct C-suite partnership.
Signature Outcomes — Lead-time reduction without cost-of-capital drag · Inventory-turn improvement · Compliant import flow

- **Supply Chain Optimization:** Designed and executed strategies to optimize China-to-India supply chain processes, materially reducing delivery timelines and improving cost of capital.
- **Operational Resolution:** Identified and resolved inefficiencies across production schedules, transit times, order-quantity gaps, loss during transit, compliance, and product quality.
- **Demand-Driven Inventory:** Aligned customer demand with supplier Minimum Order Quantities to reduce excess inventory, cut stockouts, and improve inventory turns.
- **Compliance:** Simplified complex import-compliance processes for China-to-India operations, ensuring seamless adherence to regulatory and customs requirements.
- **Analytics:** Used Tableau to surface demand trends and supply-chain bottlenecks across cross-functional teams.
- **C-Suite Partnership:** Partnered with C-suite executives on a scalable operations roadmap that improved efficiency, reduced cost, and enhanced delivery precision.

Product Manager, Merchandising and Growth – Online — 01/2021 – 06/2021

Decathlon Sports India – Bangalore, India

Scope. Online scaling for sports merchandisers across 70+ categories at Decathlon India.
Signature Outcomes — Returns 46% to 32% · 70%+ CTR lift via filter revamp · Personalized recommendations

- **Cross-Functional Leadership:** Directed sports merchandisers in scaling categories online, leveraging data-driven insights to improve product visibility and revenue.
- **Analytics Enablement:** Trained teams in advanced analytics to optimize navigation, categorization, and performance tracking, enabling data-backed decisions.
- **Return Reduction:** Delivered a **30% reduction in product returns (46% → 32%)** by addressing sizing issues and implementing targeted PDP and merchandising fixes.
- **Filter Optimization:** Revamped product-filter experiences, driving **70%+ CTR lift across 70+ sports categories** and lifting overall engagement.
- **Recommendation Improvements:** Enhanced recommendation algorithms through demand-signal analysis, materially increasing purchases influenced by personalization.

Product Manager, Analytics and CRO — 09/2019 – 12/2020

Decathlon Sports India – Bangalore, India

Scope. GA / analytics ownership, CRO program, performance dashboards for Decathlon India.
Signature Outcomes — Data error 20% to 4% · +3% Add-to-Cart · +15% product discovery · +30% cart conversion

- **Analytics Ownership:** Managed implementation and evolution of Google Analytics on agile methodologies, introducing advanced tracking for precise user-behavior monitoring aligned to business goals.
- **Data Quality:** Reduced data error rate **from 20% to 4%** by syncing backend transactional data with Google Analytics, materially improving decision reliability.
- **KPI Reporting:** Designed and shipped performance dashboards translating KPIs into executive narratives; aligned metrics with customer trends and organizational priorities.
- **Training & Enablement:** Ran analytics training and workshops to embed data-driven decision-making across the business.
- **Conversion Rate Optimization:** Delivered **+3% Add-to-Cart, +15% product discovery, +30% cart conversion** through structured A/B testing, heatmaps, and iterative UX.
- **User Experience:** Led online UX testing to identify and resolve pain points across the customer journey.
- **Partner Onboarding:** Onboarded a new analytics partner end-to-end across legal, financial, and operational workstreams.

E-Commerce Leader — 01/2019 – 09/2019

Decathlon Sri Lanka – Colombo, Sri Lanka

Scope. End-to-end e-commerce P&L for Decathlon Sri Lanka market.

Signature Outcomes — +0.4% conversion = LKR 2.9M · +16.3% registrations · Payment cost 3% to 2% · 26% margin held

- **Conversion Growth:** Lifted conversion **0.4%**, generating **LKR 2.9M** in revenue in 8 months.
- **Customer Acquisition:** Grew online registrations **16.3%**, driving user acquisition and engagement for sustained growth.
- **Margin Expansion:** Reduced payment commission from **3% to 2%**, directly improving net profit margin without compromising service quality.
- **Product Margin:** Sustained a healthy **26% product margin** through merchandising and inventory discipline.
- **Acquisition Strategy:** Designed a cost-effective acquisition model enabling scalable online growth and retention.
- **Delivery Operations:** Streamlined delivery to reduce cost and lead time, improving operational efficiency and CSAT.

Global Support Project Leader — 09/2016 – 01/2019

Decathlon Sports – Lille, France & Bangalore, India

Scope. Global e-commerce support across 32 countries; four new-country launches from Lille + Bangalore.

Signature Outcomes — 1,923 tickets resolved · CSAT 66% to 93% · OMS at 8% of industry cost · 24h delivery in 6 metros

- **Global E-Commerce Support:** Led support for a comprehensive e-commerce solution across **32 countries**, resolving **1,923 requests** and lifting client satisfaction **from 66% to 93%**.
- **Order Management System:** Engineered an OMS at **8% of industry-standard cost**, enabling **24-hour delivery across six Indian metros** and materially reducing operating cost.
- **Market Launches:** Deployed the commerce stack in four new countries, integrating local payment gateways and transportation providers.
- **Marketplace Development:** Designed and built an API-based marketplace application that streamlined sales, inventory, and reporting.
- **International Collaboration:** Coordinated international conferences with e-commerce leaders to address shared retail challenges and foster cross-border collaboration.
- **Sales Growth:** Lifted a low-catchment-area store to **64% of turnover share** through innovative demand-generation strategies.
- **Return Reduction:** Reduced product returns **19%** through targeted process improvements.
- **Financial Controls:** Restructured refund processes to minimize financial-auditing discrepancies and improve operational accuracy.
- **Team Building:** Onboarded an external hiring agency and built an in-house team of developers, testers, and delivery leads.

E-Commerce Project Manager — 05/2015 – 03/2016

Decathlon Sports India – Bangalore, India

Scope. Daily website operations + backend ERP migration for Decathlon India.

Signature Outcomes — Clean Openbravo to SAP migration · Standardized update/content/QA workflows

- **Website Operations:** Owned daily website operations, ensuring seamless performance and an optimized user experience.
- **ERP Migration:** Directed backend migration from Openbravo ERP to SAP, delivering a clean integration that supported subsequent business growth.
- **Vendor Management:** Acted as primary interface with the Canadian website provider, ensuring timely delivery of updates, features, and customizations.
- **Process Standardization:** Standardized workflows for updates, content management, and functional QA.

Retail Team Lead and Software Development Engineer — 03/2013 – 04/2015

Decathlon Sports India – Bangalore, India

Scope. Store POS modernization, multi-state tax compliance, 4,000 sq.m. flagship setup.

Signature Outcomes — ETL to online POS · VAT/Octroi compliance · Progression SDE to Team Lead

- **POS Modernization:** Transitioned legacy ETL POS systems to online POS, enabling real-time reporting, more frequent store replenishment, and accurate sales data.
- **Tax Compliance:** Simplified multi-state tax compliance (VAT, Octroi), reducing errors and improving reporting accuracy via state-specific solutions.
- **Financial Accuracy:** Resolved recurring credit-note challenges in stores, minimizing bottom-line impact.
- **Store Launch:** Directed stock implantation and operational setup for a **4,000 sq.m.** flagship sports store.

- **Team Progression:** Progressed from Software Developer to Team Lead; shipped ERP customizations for pricing, inventory, and store operations.

EDUCATION

Master of Computer Applications — 05/2014 Visvesvaraya Technological University · St Joseph Engineering College

Bachelor of Computer Science and Engineering — 04/2010 Goa University · Dhempe College of Arts & Science

CERTIFICATIONS

- Advanced Product Management Certification
- AI and Machine Learning Fundamentals Certification

SELECTED PROJECTS

- **Packstation 2.0 (Nike):** Shipped the re-imagined three-panel packing UI to Cortez EMEA production (Sept 2026); measured 4.9 s/pack saved across 318K+ live packs, underwriting €289K/yr at Cortez and €5.64M cumulative FY26–FY29 across the EMEA DC footprint. Authored the production-telemetry business case used to greenlight the rollout.
- **Japan DC (J30) Go-Live (Nike):** Delivered greenfield Japan DC launch with zero schedule slip; hypercare closed one week ahead of plan.
- **Global Commerce App (PUMA):** Delivered €2M in revenue in 90 days by launching PUMA India's high-performing commerce app with 20% higher AOV, conversion, and ASP than web.
- **Hybrid Search & Recommendations (PUMA):** Boosted engagement through hybrid search and recommendations: +20% conversion, +15% product discovery, +18% cross-sell via personalization.
- **Order Management System (Decathlon):** Designed and shipped an OMS at 8% of industry-standard cost, enabling 24-hour delivery across six Indian metros.
- **Analytics Modernization (Decathlon):** Migrated to GA4; reduced data error rate from 20% to 4% and enabled server-side tracking.
- **Supply Chain Optimization (Hopscotch):** Streamlined China-to-India supply chain, reducing delivery timelines without negatively impacting cost of capital.
- **POS System Modernization (Decathlon):** Migrated legacy systems to online POS, unlocking real-time reporting and improved store replenishment.

AWARDS & RECOGNITION

- **Most Admired Tech Implementation of the Year** — 22nd Images Fashion Awards
- **Debutante of the Year** — PUMA Sports India Pvt. Ltd
